

**Yes / No Coin**

When you don't have room for a crystal ball in your pocket and your Magic 8 Ball is being vague, the Yes/No coin has the answers to your most pressing questions - any time, anywhere.

The waffler and vacillator have found their Holy Grail of decision-making for critical questions like, should I: watch the Rocky marathon instead of mowing the lawn? Skinny-sip in the neighbor's pool? Ask her for her number? Ask him in for a night cap? Tell her that dress makes does not make her look thin? Tell him the size of his truck does matter?

Flip away the pressure and the guilt of making choices, and let the coin decide your difficult dilemmas. It's small enough to steal away in a bathing suit, bright enough to see by candle light, and it's waterproof and gluten-free.

Minted in the U.S. in antique bronze and highlighted with hand-applied enamel, this portable directive is a must for all the resolution-challenged. Bright green enamel gives you the go-ahead with a bold "YES" on the obverse. Glaring red puts the brakes on with a big "NO" on the reverse.

*We accept no responsibility for deficiencies in judgement or common sense.*

## Yes / No Coin
