Are you building a financial bugout stockpile? Are you looking for additional options to safes and bank safe-deposit boxes to scatter your bullion cache? Our large-size Bullion Bugout Tube offers you a secure, safe, and strategic method to safeguard your investment below ground.

Burying has long been a favorite and proven strategy to hide valuables. After all, people are still scouring the world for buried treasures. So, burying bullion isn't just for "preppers," it's for smart investors, too.

And yes, safes are great, but do you want to keep all your bullion "eggs" in one "basket"? Not a smart idea. If your safe falls victim to thieves, but you buried a separate repository, then you've still got your rounds underground. Bank safe-deposit boxes are not always advantageous, either. If the "SHTF," you'll likely not be able to make it to the bank – even if the bank is open. But all you need to retrieve your buried trove in your Bullion Bugout Tube is a shovel.

Overall length	22"
Inside length/depth	20"
Overall diameter	7"
Inside diameter	5-3/4"
Weight	5.63 lbs

Made from durable PVC piping, our large-size 22" x 7" tube comes with a screw-top lid for a secure fit – all to protect your precious metals from the world above and from the elements below until you need to go.
